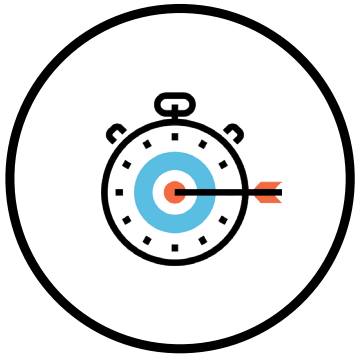
Coresuite Time

Coresuite Time is an industry-independent time recording system, where you always have your resources and projects under control. Coresuite Time contains the following functionalities:

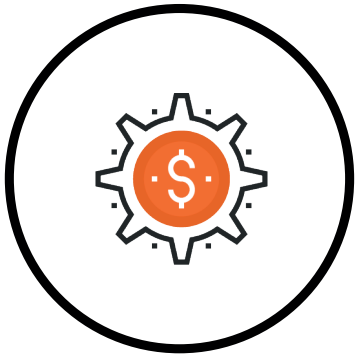
Service Management

Record efforts, material, expenses or working time quickly and easily. With the Billing Wizard, services are efficiently billed within three steps.



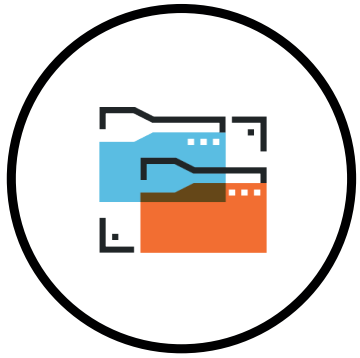
Worktime Management

Manage work, vacation and absences and define different worktime models.



Billing

Automate your billing process with the Billing Wizard. In addition, integrated subscription billing simplifies the handling of recurring invoices.



Project Management

Create and budget a project with different project phases. Book directly related services and always get an overview about the current project status.

SAP BUSINESS ONE

*To take advantage of predefined reports, we do recommend to have the coresuite country package installed too.
