

## CORESYSTEMS AG REPRESENTED IN USA!

Coresystems AG is the number one in SAP Business One & SAP Field Service Solutions. With SAP Business One, your processes are going to be more efficient and your work procedures will be improved. Since Coresystems' founding in 2006, more than 200,000 users throughout the world in a varied range of industries use Coresystems standardised AddOns and apps to implement fast and cost-effective solutions, and to quickly navigate, capture, record and report on highly complex business processes.

Our offices are located in Germany and Switzerland (Headquarter). From the Headquarter we look after our Partners in North- and Latinamerica!

Back in 2018, there has been wrong information that Coresuite products wouldn't be available and supported in the US, which is wrong! On the contrary, Coresystems AG does not only sell and support the Coresuite products, but we also develop them further. As an example, there is the new Coresuite Service or the Enterprise Search for HANA available.

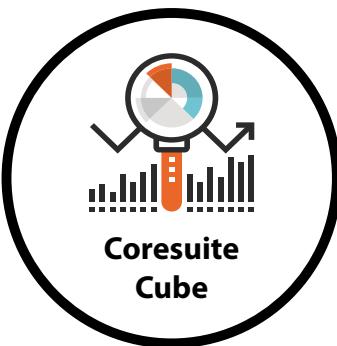

On the 10th of March we will hold a Webinar to explain everything in detail. Feel free to join!

[Register now!](#)

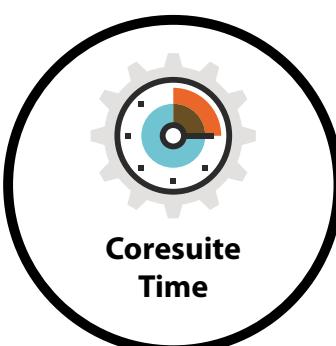

Take advantage of the whole product series we offer:

**Coresuite Country Package**

**Coresuite Cube**

**Coresuite Time**

**SAP Field Service Management**

Efficient SAP Business One projects out of the box: Reporting, Accounting, Customizing and Search.

Your required analyses will be available in the blink of an eye, with a visually appealing design. Coresuite Cube is the tool you use to extract valuable information from your data.

Time tracking made easy. Coresuite Time is an industry-independent time recording system that keeps your resources and projects under control.

With SAP Field Service Management you can solve all your field service problems for your technicians, your service agents, your management and your customers! Every single day.

**50%** partner margin on all Coresuite products (SAP FSM excluded) until the end of Q4/2020!

\*Maintenance from 2020 on regular price
